EDUCATION

Bharati Vidyapeeth College of Engineering, Pune

July 2027 (Expected)

B.Tech in Computer Science & Engineering

GPA: 9.18 / 10.0

Coursework: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks, Linear Algebra

TECHNICAL SKILLS

Languages: Python, Java, C++, C, JavaScript, SQL

Frameworks & Libraries: Spring Boot, React.js, BeautifulSoup, NumPy, Pandas, Matplotlib

Tools & Platforms: Git, Linux, Firebase, PostgreSQL, MySQL, JWT, REST APIs

EXPERIENCE

Software Development Intern | Landmine Soft

Jan 2026 – Feb 2026

Spring Boot | PostgreSQL | JWT | REST APIs | [Live API Docs](#)

- **Engineered a production-ready College Management Portal** from scratch — 3 user roles, 11+ relational entities, deployed live on Render in under 6 weeks.
- **Locked down the entire system** with JWT stateless auth, Role-Based Access Control (RBAC), and BCrypt encryption — zero-trust by design, zero vulnerabilities shipped.
- **Built 25+ REST APIs** with layered architecture, centralized exception handling, and a secure password-reset flow; fully documented via OpenAPI.

TECHNICAL PROJECTS

Automated Job Search & Matching System

Oct 2025 – Dec 2025

Python | BeautifulSoup | NLP Matching | [\[GitHub\]](#)

- **Eliminated 90% of manual job-search effort** by building an end-to-end pipeline — scrapes 100+ listings daily, deduplicates, and scores each against the user's resume keywords automatically.
- Engineered a keyword-matching algorithm that outputs a ranked compatibility score, surfacing only high-value opportunities.

Distributed Task Scheduling System

May 2025 – July 2025

Python | TCP Sockets | Multi-threading | [\[GitHub\]](#)

- **Cut task processing time by 40%** by architecting a fault-tolerant distributed system over TCP Sockets, splitting arithmetic workloads across local and remote nodes via round-robin multi-threading.
- Implemented node-disconnect recovery, keeping the system stable with zero manual restarts during testing.

Java-Based Media Management System

Aug – Sept 2024

Java | Swing | MySQL | [\[GitHub\]](#)

- Built a full desktop music player with playlist management, MySQL-backed persistence, and a responsive Swing GUI — applying clean OOP design patterns throughout.

3D Rendering Engine Prototype

Aug – Sept 2024

Python | NumPy | Linear Algebra | [\[GitHub\]](#)

- Built a 3D-to-2D transformation engine from scratch using matrix math (rotation, scaling, translation), optimized with NumPy for real-time rendering performance.

AWARDS & ACHIEVEMENTS

- **National Children's Science Congress (NCSC):** Awarded nationally for research project on "Headphone Overuse Awareness."
- **Math Olympiad:** Multiple certificates of merit in regional Mathematics Olympiads.
- **DSA & Competitive Programming:** 94 problems solved on LeetCode (50 Easy, 42 Medium, 2 Hard) — actively levelling up.
